Fund manager's commentary

Global equities fell 2.45% in sterling, led lower by US technology stocks, down 9.51% on fears of a capital spending slow-down caused by tighter monetary policy and public unease at the environmental and social impact of the growth of datacentres. Within the EF Brompton Global Adventurous Fund, the iShares Core S&P 500 exchange-traded fund fell 1.71% but the iShares S&P 500 Equal Weight ETF, which has a lower technology weighting, rose 4.08%. Within the portfolio's global equity allocation, the iShares Global Semiconductors ETF fell 16.79% but Clearbridge Global Infrastructure Income rose 4.26%. Equities in Asia excluding Japan and emerging markets lagged, falling 8.97% and 8.81% in sterling respectively as US technology sector weakness spread to Asian technology hardware producers. Within the portfolio, Barings Korea fell 20.34% but Chikara Indian Subcontinent and Prusik Asian Equity Income, which have low technology weightings, rose 0.24% and fell only 3.31% respectively. Global bonds rose 0.56% in sterling while UK government bonds returned 1.67%. Within the portfolio, the sterling-hedged Pimco Global Low Duration Real Return holding rose 1.56% but the iShares $ Treasury 0-1 Year ETF fell 0.44%, negatively affected by the dollar's 0.84% fall against the pound. The iShares UK Gilts 0-5 Years ETF was added to the portfolio because of its attractive inflation-adjusted yield. The portfolio's sole alternative holding, Trojan, a conservative multi-asset investment, rose 2.19%. Rising interest rates fuelled the iShares Physical Gold exchange-traded commodity's 7.09% fall. The EF Brompton Global Adventurous Fund fell 1.19% in October while the sector fell 1.38%.

BROMPTON
ASSET MANAGEMENT

EF Brompton Global Adventurous Fund (continued)

An EF Brompton Multi-Manager OEIC sub-fund

Investment policy

In order to achieve its objective, the Fund will adopt an adventurous strategy. To reflect this strategy, the investment manager has the discretion to invest up to 100% of the Fund's net asset value in equities, with a minimum equity exposure of 70%, providing exposure to global equity markets.

The Fund may invest in other asset classes, such as cash, fixed income, alternatives and property.

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes. The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts. Investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.

1st quartile means the fund is ranked in the top 25% of funds in its sector

Important Information

For full details of the fund and its risks please refer to the prospectus or Key Investor Information and Supplementary Information Document, which can be found on the Brompton Asset Management website, www.bromptonam.com. The value of assets and income generated from them may fall as well as rise. Investors may not get a steady income flow and, on disposal, may not receive all their capital back.

Past performance is not an indicator of future performance.
