BROMPTON ASSET MANAGEMENT

31 December 2025

Gill Lakin
Fund manager

EF Brompton Global Balanced Fund

An EF Brompton Multi-Manager OEIC sub-fund

Fund manager's commentary

Global equities and bonds retreated 0.43% and 1.23% respectively in sterling, with US stocks weaker still, down 1.43% as the dollar fell 1.49% against the pound. The Federal Reserve cut its policy interest rate by a quarter percentage point to 3.5-3.75%, with jobs data weak despite elevated inflation. Growth-oriented investments lagged value-oriented investments as US technology stocks fell 1.90% in sterling. The EF Brompton Global Balanced Fund held no dedicated technology investments in December in response to high valuations and concentration risk in the US market but an allocation may be introduced should stock prices fall. By contrast, equities in Europe excluding the UK outperformed, rising 2.40% in sterling, while UK equities rose 2.18%. Within the UK allocation, Man Income gained 3.43% but Aberforth UK Small Companies rose only 1.33%. Within the Europe ex-UK allocation, Lightman European, a value-oriented investment, did best, up 3.00%, but the iShares MSCI EMU exchange-traded fund (ETF) rose only 2.12%. Dollar weakness buoyed equities in emerging markets and Asia excluding Japan. Within the portfolio, Redwheel Next Generation Emerging Markets Equity rose 4.17% but Prusik Asian Equity Income fell 0.30%. Within the bond allocation, Schroder Strategic Credit, a UK investment, did best, rising 0.61% but the iShares \$ Treasury Bond 0-1 Year ETF fell 1.12%. In January, US intervention in Venezuela, which has the world's largest oil reserves, may prove expansionary longer term because higher Venezuelan output may lower energy prices. The EF Brompton Global Balanced Fund rose 0.81% in December while the sector rose 0.42%.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
