Gill Lakin
Fund manager

EF Brompton Global Conservative Fund

An EF Brompton Multi-Manager OEIC sub-fund

Fund manager's commentary

The Federal Reserve left its interest rate unchanged because US inflation remained elevated but the European Central bank made a quarter percentage point cut and the Bank of England followed suit in early February. Eurozone inflation is expected to be close to target in 2025 but UK inflation may prove sticky. Global equities rose 4.20% in sterling after outperformance by equities in Europe excluding the UK, up 8.26% in sterling, and in the UK, up 5.54%. The EF Brompton Global Conservative Fund's relatively low Europe ex-UK equity allocation and underperformance by Lightman European, a value-focussed holding that gained 7.03%, hurt performance. In the UK, Fidelity Index UK gained 5.50% but Artemis UK Special Situations and Man Income underperformed, up 3.94% and 4.43% respectively, because of their bias towards small and medium-sized companies; small companies rose just 1.50% and Aberforth UK Small Companies fell 1.83% as investors digested the deterioration in UK trends after the BoE forecast economic growth of just 0.75% in 2025 and peak inflation of 3.7%. The allocation to UK larger companies on low valuations was increased through an addition to Fidelity Index UK. Global bonds rose 1.36% in sterling. Within the portfolio, the iShares \$ Treasury Bond 0-1 Year exchange-traded fund and the sterling-hedged Pimco Low Duration Real Return holding rose 1.16% and 1.09% respectively. The iShares Physical Gold exchange-traded commodity was the best performer, up 8.55% as tariff threats spooked investors. The EF Brompton Global Conservative Fund rose 1.50% in January while the sector rose 1.72%.

ASSET MANAGEMENT

EF Brompton Global Conservative Fund (continued)

An EF Brompton Multi-Manager OEIC sub-fund

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that no more than 35% of the total Fund will have exposure to equity markets, with the remainder of the portfolio providing exposure to assets such as alternatives, commodities, property, cash, cash equivalents and fixed income investments, in order to maintain its conservative risk profile. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 0-35% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
