### Fund manager's commentary

Global equities fell 6.25% in sterling as America's tariff plans unsettled investors. European Union and UK exporters face 20% and 10% tariffs respectively while some developing countries will incur higher rates. US stocks underperformed, down 7.94% in sterling. The EF Brompton Global Conservative Fund's iShares S&P 500 exchange-traded fund (ETF) holding fell 7.97%, dragged lower by the technology sector's 11.73% fall, but the iShares S&P 500 Equal Weight ETF fell only 5.79%. Among the other global equity holdings, Clearbridge Global Infrastructure Income and Polar Capital Global Insurance bucked the negative trend, up 1.85% and 0.32% respectively. UK equities outperformed, down 1.99%, as did equities in Europe excluding the UK, down 2.88% in sterling. Within the portfolio, Artemis UK Special Situations, down 3.65%, suffered from its bias towards smaller companies, which fell 3.72%. Equities in emerging markets and Asia excluding Japan were relatively resilient, down 1.79% and 2.39% respectively in sterling. Within the portfolio, Prusik Asian Equity Income fell just 0.54% but Man Asia (ex-Japan) equity fell 2.41%. ## ASSET MANAGEMENT

### EF Brompton Global Conservative Fund (continued)

An EF Brompton Multi-Manager OEIC sub-fund

#### Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that no more than 35% of the total Fund will have exposure to equity markets, with the remainder of the portfolio providing exposure to assets such as alternatives, commodities, property, cash, cash equivalents and fixed income investments, in order to maintain its conservative risk profile. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 0-35% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
