Fund manager's commentary

While the Federal Reserve held its official rate at 4.25-4.5%, the Bank of England cut Bank Rate a quarter percentage point to 4.25% while the European Central Bank followed suit in early June, cutting its rate to 2%. Global equities rose 4.81% in sterling but bonds fell 1.30%. The Fed reported solid economic growth but elevated inflation. US stocks rose 5.28% in sterling as technology shares rebounded 9.99%. Polar Capital Global Technology was the EF Brompton Global Equity Fund's best performer, up 14.31%, but the iShares S&P Equal Weight exchange-traded fund (ETF), lagged, up only 3.31% because of its lower technology allocation. In the UK, smaller companies, up 7.16%, outperformed the broader market, up 4.06%. Within the portfolio, Artemis UK Special Situations and Man Income gained 8.61% and 5.24% respectively because of their smaller-company bias. In Europe excluding the UK, where equities gained 3.87% in sterling, the iShares MSCI EMU ETF outperformed, up 4.71% thanks to gains by French and German stocks, but Lightman European rose only 3.58%. Japanese equities rose only 2.91% in sterling and Nippon Active Value did worse, falling 3.68%. Equities in emerging markets and Asia excluding Japan also lagged, up 3.31% and 4.29% respectively in sterling, with Chinese shares rising only 1.78% despite a Sino-US tariff rapprochement. Within the portfolio, Redwheel Next Generation Emerging Markets Equity, which has no Chinese stocks, rose 3.99% but Man Asia (ex-Japan) Equity rose only 2.82%. The EF Brompton Global Equity Fund gained 4.58% in May while the sector gained 5.11%.

ASSET MANAGEMENT

EF Brompton Global Equity Fund (continued)

An EF Brompton Multi-Manager OEIC sub-fund

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes. The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

Investments will not be confined by industrial, economic or geographical sector. The Fund may hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Global. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
