EF Brompton Global Growth Fund

An EF Brompton Multi-Manager OEIC sub-fund

Fund manager's commentary

The Federal Reserve commenced monetary easing, cutting its policy rate by a half percentage point. Global equities rose 2.36% in dollars but only 0.29% in sterling as the dollar fell 2.02% against the pound. China announced a stimulus package in response to slow economic growth and weak inflation. Measures to stimulate bank lending included cuts to interest rates and the reserve requirement ratio, the amount of capital banks must hold on their balance sheets. Additionally, a \$114 billion war chest was made available for state equity purchases. Chinese stocks rose 21.42% in sterling, fuelling gains for equities in Asia excluding Japan and emerging markets of 6.28% and 4.56% respectively. The EF Brompton Global Growth Fund benefited from its overweight allocation to these markets, where the best-performing holding was Man GLG Asia (ex-Japan) Equity, up 6.53%. Mobius Investment Trust, however, rose just 1.10%. UK stocks fell 1.57% as investors anticipated higher taxes in October's budget. All UK equity holdings fell, with Chelverton UK Equity Growth doing worst, falling 3.81%. Man GLG Income, down 0.96%, was, however, relatively resilient. Global bonds rose 1.70% in dollars but fell 0.35% in sterling. All bond investments gained, however, partly because the global bond holdings were sterling hedged. TwentyFour Dynamic Bond did best, rising 1.27%, while the sterling-hedged Vanguard Global Bond holding returned 1.20%. Bullion was strong as Middle East conflict intensified and the iShares Physical Gold exchange-traded commodity rose 2.51%. The EF Brompton Global Growth Fund rose 0.66% in September while the sector gained 0.53%.

BROMPTON

ASSET MANAGEMENT

EF Brompton Global Growth Fund (continued)

An EF Brompton Multi-Manager OEIC sub-fund

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
