†† The historic yield on the B share class reflects distributions paid or declared over the past 12 months as a percentage of the share price at the date of this document. It does not include any initial charge and investors may be subject to tax on distributions.

All of the fund's expenses are charged to capital. This has had the effect of increasing the distributions paid on an annualised basis by approximately 0.90 percentage points on the B share class and reducing the capital performance by an equivalent amount.

Fund manager's commentary

The Federal Reserve and European Central Bank raised their policy interest rates by a quarter percentage point to combat inflation as the Iran War caused the oil price to rise 12.15% in sterling. Global bonds fell 2.38% in dollar terms but just 0.37% in sterling as the dollar strengthened 2.06% against the pound while UK government bonds fell 1.30% on fears that the Bank of England would also raise its policy rate. Within the EF Brompton Global Income Fund, the iShares \$ Treasury Bond 0-1 Year exchange-traded fund (ETF) benefited from its short duration, rising 2.32%, but Pimco Low Duration Real Return, also a short-duration holding, fell 1.38% due to its sterling hedging while TwentyFour Dynamic Bond, a longer-duration holding, fell 2.00%. US equities gained 1.71% in sterling, led by technology stocks, up 7.11%, and outperforming the 0.96% rise in global stocks. The iShares MSCI Global Semiconductors ETF was the best performer, up 12.59%, but the portfolio's relatively-low US equity allocation hurt overall performance. Equities in Asia excluding Japan and emerging markets gained 1.80% and 1.54% respectively in sterling but the portfolio's holdings underperformed. Chikara Indian Subcontinent fell 5.81% amid concerns for India as an energy importer while Prusik Asian Equity Income, which is underweight in the technology sector, fell 1.14%. In Japan, where stocks gained 3.44% in sterling, Baillie Gifford Japanese Smaller Companies rose only 1.92%. The EF Brompton Global Income Fund fell 1.25% in September while the sector fell 1.05%. At 30 September, the historic yield was 3.07%.

ASSET MANAGEMENT

EF Brompton Global Income Fund (continued)

An EF Brompton Multi-Manager OEIC sub-fund

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes.

The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
