Initial charge	2%
Total expense ratio	1.61%

ACD admin charge	0.25%
Ex-dividend date	1 August
Income distribution date	30 September
Structure	OEIC sub-fund
Year end	31 July
B SEDOL code	BG6LVS3
B ISIN code	GB00BG6LVS30

Fund manager's commentary

Global equities and global bonds gained 4.11% and 3.43% respectively in sterling in response to easing inflation, with US, eurozone and UK headline measures dropping to 3.1%, 2.4% and 3.9% respectively, partly due to lower oil prices. Federal Reserve surveys showed investors thought interest rates had peaked and would fall as soon as June. Within the EF Brompton Global Balanced Fund, the sterling-hedged iShares \$ Treasury Bond 7-10 Years exchange-traded fund (ETF) and Vanguard Global Bond holdings rose 3.80% and 3.35% respectively. In the UK, government bonds, investment-grade corporate bonds and high-yield bonds returned 5.72%, 4.63% and 2.82% respectively. Jupiter Dynamic Bond rose 5.35%. Interest-rate sensitivity increased through reductions in cash and cash-equivalents, the purchase of Henderson Fixed Interest Monthly Income, the reduction of Schroder Strategic Credit in favour of an increase in Jupiter Dynamic Bond and an increased equity allocation. UK equities outperformed, rising 4.50%, with small companies particularly strong, up 9.63%. All UK equity holdings outperformed, with Aberforth UK Small Companies doing best, up 7.88%. Within the global equity allocation, Polar Capital Global Technology rose 4.84% but Polar Capital Global Insurance fell 3.19%. Equities in Asia excluding Japan and emerging markets lagged, up 2.83% and 3.22% respectively in sterling. Redwheel Global Emerging Markets, up 0.60%, did worse. Among the alternative holdings, Man GLG UK Absolute Value rose 1.00% but 3i Infrastructure fell 1.53%. Trojan, a conservative multi-asset investment, was sold. The EF Brompton Global Balanced Fund rose 3.03%† in December while the sector rose 3.83%.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
