Investment management fee	0.75%
Initial charge	2%
Total expense ratio	1.61%

ACD admin charge	0.25%
Ex-dividend date	1 August
Income distribution date	30 September
Structure	OEIC sub-fund
Year end	31 July
B SEDOL code	BG6LVS3
B ISIN code	GB00BG6LVS30

Fund manager's commentary

Global equities rose 0.71% in sterling, led higher by growth stocks, up 1.41%, while bonds fell 1.27% as leading central banks left their policy interest rates on hold amid signs of abating inflationary pressures. Despite earlier monetary tightening, fourth-quarter US economic growth was 3.3% while unemployment remained low at 3.7%. US technology stocks outperformed, up 3.99% in sterling as companies reported better-than-expected figures. This fuelled the 1.79% gain for US stocks overall. Within the EF Brompton Global Balanced Fund, Polar Capital Global Technology gained 5.71% while the iShares Nasdaq 100 exchange-traded fund (ETF) gained 1.97%. Equities in Asia excluding Japan and emerging markets underperformed, however, down 5.34% and 4.53% respectively in sterling as Chinese stocks fell 10.52%. China's economic growth is slowing as property sector woes affect economic activity. In addition, a threat by Donald Trump, the likely Republican nominee for this year's US presidential election, to increase trade sanctions and remove China's most-favoured nation trading status affected investor sentiment. Redwheel Global Emerging Markets Equity was the weakest holding, down 5.75%, but Prusik Asian Equity Income was relatively resilient, down 3.28%. Japanese stocks rose 4.09% in sterling despite the yen's 3.45% fall against the pound as Japan's ultra-easy monetary policy was maintained. Man GLG Japan CoreAlpha rose 4.02% but Comgest Growth Japan fell 0.14%. Within the bond allocation, TwentyFour Dynamic Bond returned 1.35% but the sterling-hedged Redwheel Asia Convertibles holding fell 1.49%. The EF Brompton Global Balanced Fund rose 0.42%† in January while the sector fell 0.40%.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
