ACD admin charge	0.25%
Ex-dividend date	1 August
Income distribution date	30 September
Structure	OEIC sub-fund
Year end	31 July
B SEDOL code	BG6LVS3
B ISIN code	GB00BG6LVS30

Fund manager's commentary

Global equities rose 1.00% in sterling despite the failure of three smaller US banks and UBS's state-sponsored rescue of Credit Suisse, a systemically-important institution, which showed the cumulative impact of rising interest rates on the banking system. Investors inferred peak rates might be close-at-hand. Global bonds rose 1.01% in sterling while UK government bonds returned 3.03%. Within the EF Brompton Global Balanced Fund, the sterling-hedged holding in the iShares \$ Treasury Bond 7-10 Years exchange-traded fund rose 3.61% but TwentyFour Dynamic Bond, which holds corporate bonds rendered valueless in the Credit Suisse rescue, fell 2.57%. The Bank of England raised Bank rate by a quarter percentage point and lifted its economic forecast. UK equities fell 3.12% because of London's bias towards the economically-sensitive financial and energy sectors. Within the portfolio, Man GLG Income, which has a value focus, fell 5.75% but Liontrust Special Situations, a growth-oriented investment, fell only 1.43%. Smaller companies lagged, down 5.61%, and Aberforth UK Smaller Companies and Chelverton UK Equity Growth did worse, down 6.42% and 6.35% respectively. Gold, as a safe-haven asset, benefitted from banking sector woes, and the iShares Physical Gold exchange-traded commodity gained 6.23%. The portfolio benefitted from its relatively-high weightings in Japan and Asia excluding Japan, up 1.92% and 1.35% respectively in sterling. Lindsell Train Japanese Equity was the best Asian performer, up 2.06%, while Matthews Asia ex Japan Total Return Equity was the worst, down 1.15%. The EF Brompton Global Balanced Fund fell 0.44%† in March while the sector fell 0.57%.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
