Investment management fee	0.75%
Initial charge	2%
Total expense ratio	1.60%

ACD admin charge	0.25%
Ex-dividend date	1 August
Income distribution date	30 September
Structure	OEIC sub-fund
Year end	31 July
B SEDOL code	BG6LVS3
B ISIN code	GB00BG6LVS30

Fund manager's commentary

Inflationary pressures eased but the Federal Reserve (Fed), Bank of England (BoE) and European Central Bank left their official interest rates unchanged, aiming to bring inflation sustainably to target. By contrast, the Bank of Japan tightened policy for the first time since 2007, ending Japan's negative interest rate era. Japanese stocks rose 3.42% in sterling. Within the EF Brompton Global Balanced Fund, Man GLG Japan CoreAlpha outperformed, up 5.78%. Comgest Growth Japan lagged, rising 2.74%, but Japan's monetary policy shift may produce a rotation from value stocks that benefitted from yen-weakness towards growth stocks. The Fed lifted its 2024 economic growth forecast from December's 1.2-1.7% to 2-2.4%. US stocks rose 3.36% in sterling, beating global stocks, up 3.33%, but technology stocks lagged, rising only 2.49%. Within the portfolio, Polar Capital Global Technology and the iShares Nasdaq 100 exchange-traded fund did worse, rising 0.64% and 1.33% respectively. Dimensional Global Targeted Value, a small cap investment that should benefit from changing equity market leadership, was added to the global allocation. The tech-lite UK stockmarket outperformed, up 4.71% as the BoE forecast economic recovery and inflation below 2% in the second quarter of 2024. All four of the portfolio's UK equity holdings lagged, however, with Liontrust Special Situations, up 2.33%, weakest. With interest rate cuts approaching, the iShares Physical Gold exchange-traded commodity gained 8.26%. Of the bond investments, the sterling-hedged Redwheel Asia Convertibles holding did best, returning 2.23%. The EF Brompton Global Balanced Fund rose 2.42%† in March while the sector rose 2.39%.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
