### Fund manager's commentary

Global equities and bonds fell 2.42% and 0.62% respectively in sterling as leading central banks left their official interest rates unchanged despite above-target inflation and resilient economic growth and employment data. Buying, however, by risk-averse investors in the wake of renewed Middle East conflict lifted the prices of gold and gold miners. Within the EF Brompton Global Equity Fund, the iShares Gold Producers exchange-traded fund gained 4.66%. Of the other global holdings, Polar Capital Global Insurance did best, up 1.69% as insurers benefited from rising premiums and higher returns on cash, but Polar Capital Global Technology was the worst, down 2.58%. UK stocks underperformed, down 4.06%, while smaller companies, which tend to be more sensitive to domestic trends, did worse, down 6.96%. Within the portfolio, Man GLG Income lagged, down 5.15%. Artemis UK Special Situations was added to the UK allocation. US stocks, down 1.53% in sterling, outperformed but equities in emerging markets and Asia excluding Japan fell 3.31% and 3.30% respectively. Within the portfolio, Man GLG Asia (ex Japan) Equity proved resilient, down 2.82%, but Baillie Gifford Pacific and Redwheel Global Emerging Markets fell 5.37% and 5.86% respectively. In Japan, where stocks fell 3.85% in sterling, Nippon Active Value lagged, down 10.03%, but Lindsell Train Japanese Equity, down 2.25%, was relatively resilient. Man GLG Japan CoreAlpha was added to the allocation. The EF Brompton Global Equity Fund fell 3.39%† in October while the sector fell 3.81%.

## Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes. The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

Investments will not be confined by industrial, economic or geographical sector. The Fund may hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Global. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
