Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes. The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

Investments will not be confined by industrial, economic or geographical sector. The Fund may hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Global. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
