Initial charge	2%
Total expense ratio	1.79%

ACD admin charge	0.25%
Ex-dividend date	1 August
Income distribution date	30 September
Structure	OEIC sub-fund
Year end	31 July
B SEDOL code	BG6LVX8
B ISIN code	GB00BG6LVX82

Fund manager's commentary

The Federal Reserve increased its official interest rate by a quarter percentage point to 5.25-5.5% and US inflation slowed to 3.0%, raising hopes that peak rates may be close. UK inflation remained stubbornly high at 7.9%, prompting the Bank of England to raise Bank Rate by a quarter point in August. Global equities rose 2.46% in sterling but global bonds fell 0.51%. Among the EF Brompton Global Growth Fund's global equity holdings, the iShares Gold Producers exchange-traded fund (ETF) did best, up 2.77% as gold prices rose 1.36% in sterling, but Guinness Global Equity Income gained only 0.78%. UK equities rose 2.55% and small companies outperformed, rising 4.24%. Higher interest rates may, however, affect economic activity and the UK equity allocation was reduced through reductions in Liontrust Special Situations and Chelverton UK Equity Growth. UK government bonds, sterling investment-grade corporate bonds and sterling high-yield bonds returned 0.81%, 2.44% and 2.21% respectively. Within the portfolio, Schroder Strategic Credit rose 1.41% but the sterling-hedged iShares \$ Treasury Bond 7-10 Years ETF fell 0.66%. Equities in emerging markets and Asia excluding Japan outperformed, up 5.03% and 4.94% respectively in sterling, with Chinese stocks, in particular, benefiting from Beijing's plans to support consumer spending as the growth boost delivered by the withdrawal of zero-Covid-19 policies wanes. Within the portfolio, Redwheel Global Emerging Markets and Baillie Gifford Pacific rose 8.01% and 7.12% respectively but Stewart Investors Indian Subcontinent fell 0.66%. The EF Brompton Global Growth Fund rose 1.74%† in July while the sector rose 1.73%.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
