Total expense ratio	1.79%

ACD admin charge	0.25%
Ex-dividend date	1 August
Income distribution date	30 September
Structure	OEIC sub-fund
Year end	31 July
B SEDOL code	BG6LVX8
B ISIN code	GB00BG6LVX82

Fund manager's commentary

Global equities rose 0.40% in sterling, buoyed by US stocks, up 1.85%. US technology stocks were particularly strong, rising 12.18% in sterling as Nvidia, an artificial intelligence hardware and software supplier, announced better-than-expected results. Polar Capital Global Technology was the EF Brompton Global Growth Fund's strongest performer, rising 13.76%. The other global equity investments underperformed, however, with the iShares Gold Producers exchange-traded fund doing worst, down 7.10%. The Federal Reserve increased its official interest rate by a quarter percentage point to 5-5.25% and implied this might be its last increase in the short term. Growth stocks benefited, rising 3.47% in sterling while value stocks fell 2.83%. Global bonds fell 0.57% in sterling. UK inflation, dropping from 10.1% to 8.7%, disappointed investors. In response, UK government bonds and sterling investment grade corporate bonds fell 3.83% and 2.38% respectively but high-yield bonds returned 0.35%. Within the portfolio, the sterling-hedged Vanguard Global Bond holding fell 0.61% but Schroder Strategic Credit rose 0.50%. UK stocks fell 5.00% but all UK equity holdings outperformed, with Man GLG Undervalued Assets most resilient, down 0.55%. Equities in Asia excluding Japan and emerging markets fell 0.43% and 0.26% respectively in sterling, dragged lower by Chinese stocks, down 7.12% on fears the stimulus from the end of zero-Covid-19 policies would prove short-lived. Within the portfolio, Stewart Investors Indian Subcontinent rose 6.08%, beating Indian stocks, up 4.41% in sterling, but Baillie Gifford Pacific fell 4.99%. The EF Brompton Global Growth Fund rose 0.24%† in May while the sector fell 0.71%.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds, unregulated collective investment schemes, and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 40% to a maximum of 85% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 40-85% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
