†† The historic yield on the B share class reflects distributions paid or declared over the past 12 months as a percentage of the share price at the date of this document. It does not include any initial charge and investors may be subject to tax on distributions.

All of the fund's expenses are charged to capital. This has had the effect of increasing the distributions paid on an annualised basis by approximately 0.90 percentage points on the B share class and reducing the capital performance by an equivalent amount.

Fund manager's commentary

UK stocks gained 2.67%, outperforming the 1.12% rise by global equity markets in sterling. UK equities rose as the Tories won a convincing election victory. UK smaller stocks did even better, rising 8.15% because small companies are typically more sensitive to domestic conditions. Of the EF Brompton Global Income Fund UK equity fund holdings, Aberforth Split Level Income and Chelverton UK Equity Growth, which invest in smaller companies, did best, rising 11.31% and 8.47% respectively. Man GLG UK Income, a value-oriented fund, also did well, rising 4.83%. Investment in UK equity funds increased through a purchase of the Vanguard FTSE 250 exchange-traded fund. Uncertainty remains because trade with the European Union will, without an agreement, default to World Trade Organisation terms. Sterling rose 2.42% and 1.64% respectively against the dollar and yen. An interim Sino-US trade deal was agreed in principle and equities in emerging markets and Asia excluding Japan rose 4.99% and 4.19% respectively in sterling and JP Morgan Russian Securities outperformed, rising 5.29%. Schroder Asian Income Maximiser and Schroder Oriental Income lagged, however, rising 1.07% and 2.38% respectively. In a weak month for fixed income, global bonds fell 1.79% in sterling while UK government bonds fell 1.52% and sterling corporate bonds returned only 0.09%. Templeton Emerging Markets Bond outperformed, returning 1.97%. A holding in Legg Mason Global Infrastructure was added to the portfolio. The EF Brompton Global Income Fund gained 1.88%† in December while the sector rose 1.26%. At 31 December, the historic yield was 3.09%††.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes.

The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
