EF Brompton Global Income Fund

An EF Brompton Multi-Manager OEIC sub-fund

Fund manager's commentary

Global equities fell 3.99% in sterling and global bonds fell 1.11% on fears of rising inflation and interest rates. Global recovery and fears that Russia would invade Ukraine combined, however, to lift oil prices 19.12% in sterling. Growth stocks underperformed in a sea change in favour of value stocks. US technology stocks fell 7.33% in sterling, underperforming US stocks, which fell 4.27%. Within the EF Brompton Global Income Fund, Polar Capital Global Technology fell 10.41% and sector weakness also hurt Montanaro European Income, which fell 11.27% while equities in Europe excluding the UK fell 5.24% in sterling. The other conspicuously weak holdings included T Rowe Price Japanese Equity, down 11.53% while Japanese equities fell 3.98% in sterling. UK stocks rose 1.86% because of London's heavy weightings in value sectors. All UK equity holdings lagged, however, with Chelverton UK Equity Income the weakest, down 4.82%. Man GLG Income, however, gained 1.16%. Of the two property holdings, BMO Commercial Property did best, returning 9.53%, while BlackRock World Mining, up 6.96%, was the strongest global equity holding. UK government bonds fell 3.86% while sterling investment-grade corporate bonds and high-yield bonds fell 3.13% and 1.36% respectively. Within the portfolio, Royal London Short Duration Global High Yield Bond was the most resilient holding, down 0.71%, while TwentyFour Dynamic Bond was weakest, down 2.68%. The EF Brompton Global Income Fund fell 3.12%† in January while the sector fell 3.13%. At 31 January, the historic yield was 2.71%††. Future income will be adversely affected by Covid-19-related dividend cuts.

I ISIN code	GB00B54WNN09

†† The historic yield on the B share class reflects distributions paid or declared over the past 12 months as a percentage of the share price at the date of this document. It does not include any initial charge and investors may be subject to tax on distributions.

All of the fund's expenses are charged to capital. This has had the effect of increasing the distributions paid on an annualised basis by approximately 0.90 percentage points on the B share class and reducing the capital performance by an equivalent amount.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes.

The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
