B ISIN code	GB00B7KZXR16
I SEDOL code	B54WNN0
I ISIN code	GB00B54WNN09

†† The historic yield on the B share class reflects distributions paid or declared over the past 12 months as a percentage of the share price at the date of this document. It does not include any initial charge and investors may be subject to tax on distributions.

All of the fund's expenses are charged to capital. This has had the effect of increasing the distributions paid on an annualised basis by approximately 0.90 percentage points on the B share class and reducing the capital performance by an equivalent amount.

Fund manager's commentary

Global equities fell 10.83% in sterling while bonds rose 0.70% as more countries moved into lock-down to combat Covid-19. The Federal Reserve and Bank of England cut interest rates to near zero and announced quantitative easing. The US and UK governments launched fiscal stimulus packages of \$2 trillion and £330 billion respectively to help businesses and families. The global gross domestic product fall will be sharp and large but should prove temporary and the monetary and fiscal measures may in time ensure a strong recovery. Oil prices fell 53.35% in sterling in response to the Russo-Saudi price war. Lower energy costs may provide a further economic stimulus. UK equities lagged, falling 13.44%, while smaller companies did even worse, down 28.01%. Among the EF Brompton Global Income Fund's UK equity holdings, the Aberforth Split Level Income investment trust was the weakest, falling 40.83%, while the Vanguard FTSE 250 exchange-traded fund (ETF) fell 24.17%. Among the actively-managed global equity investments, Polar Capital Global Technology, was most resilient, down 3.73%, while Legg Mason Global Infrastructure, down 12.41%, did worst. UK government bonds rose 1.59% but sterling corporate and high-yield bonds fell 7.52% and 13.19% respectively. Within the portfolio, the weakest holding was Schroder Strategic Credit, down 11.19%. The iShares \$ Treasury Bond 7-10 Years ETF was added to the portfolio. The sole alternative holding, 3i Infrastructure, down 16.53%, was increased. The EF Brompton Global Income Fund fell 12.68%† in March while the sector fell 10.21%. At 31 March, the historic yield was 3.84%††. Future income may be affected by Covid-19-related dividend cuts.

Please see overleaf for performance and other important information

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes.

The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
