B ISIN code	GB00B7KZXR16
I SEDOL code	B54WNN0
I ISIN code	GB00B54WNN09

†† The historic yield on the B share class reflects distributions paid or declared over the past 12 months as a percentage of the share price at the date of this document. It does not include any initial charge and investors may be subject to tax on distributions.

All of the fund's expenses are charged to capital. This has had the effect of increasing the distributions paid on an annualised basis by approximately 0.90 percentage points on the B share class and reducing the capital performance by an equivalent amount.

Fund manager's commentary

Global equities rose 8.82% in sterling as the efficacy of three Covid-19 vaccines surpassed expectations. Cyclical stocks outperformed, contributing to a 13.15% rise in the EF Brompton Global Income Fund's holding in the iShares World Value Factor exchange-traded fund (ETF). This holding was increased at the expense of growth-oriented investments. Of the other global equity holdings, BlackRock World Mining and Fidelity Global Income were strongest, rising 14.28% and 9.88% respectively, while Polar Capital Global Technology, up 5.22%, was weakest as a result of its growth focus. UK equities outperformed, rising 13.11% as cyclical stocks rose and EU trade talks appeared to progress. Within the portfolio, two value-oriented holdings, the Aberforth Split Level Income investment trust and Man GLG UK Income, outperformed, rising 45.88% and 19.53% respectively, but Chelverton UK Equity Growth, a growth-oriented holding, rose only 11.69%. Equities in Europe excluding the UK also outperformed, rising 13.42%, but BlackRock Continental European Income rose only 12.09%. In Asia excluding Japan and emerging markets, where equities gained 4.64% and 5.81% respectively in sterling, Schroder Oriental Income and JP Morgan Emerging Markets Income outperformed, rising 12.33% and 8.33% respectively. Within the bond allocation, TwentyFour Dynamic Bond and Schroder Strategic Credit returned 3.52% and 3.47% respectively but the iShares \$ Treasury Bond 7-10 Years ETF fell 2.87%. The EF Brompton Global Income Fund rose 7.31%† in November while the sector gained 5.97%. At 30 November, the historic yield was 2.83%††. Future income will be adversely affected by Covid-19-related dividend cuts.

Investment policy

The Fund will typically invest a minimum of 80% of its net asset value in collective investment schemes, exchange traded funds and unregulated collective investment schemes.

The Fund may also invest in investment trusts (and similar instruments), other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that exposure to equity markets will typically range from a minimum of 20% to a maximum of 60% of the total Fund, with the aim of achieving the Fund's objective. However, investments will not be confined by industrial, economic or geographical sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets.

The Fund may utilise derivatives for the purposes of efficient portfolio management (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling).

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
