† The historic yield reflects distributions paid or declared over the past 12 months as a percentage of the share price at the date of this document. It does not include any initial charge and investors may be subject to tax on distributions.

All of the fund's expenses are charged to capital. This has had the effect of increasing the distributions paid on an annualised basis by approximately 0.90 percentage points on the B share class and reducing the capital performance by an equivalent amount.

### Fund manager's commentary

Sterling strengthened and UK equities rose 2.16% in April, outperforming global equities, which fell 0.28% in sterling. UK first-quarter gross domestic product data revealed the strength of the economic recovery, with annualised growth hitting 3.1%, the highest since 2007. The improvement was reflected in strengthening manufacturing, consumer and housing data. UK market leadership changed, with the FTSE 100 Index of larger companies rising 3.09% against 0.26% for smaller companies. Corporate activity amongst larger companies was a contributory factor as exemplified by Pfizer's AstraZeneca bid approach. Further takeover activity is likely as management teams respond to the low and stable interest rates, strong demand for corporate credit and economic growth. Talented stock selectors and those with a focus on "value" investing may perform best in this environment. US economic data surprised positively as unemployment declined to 6.3% but the US equity market fell 0.54% in sterling as highly-valued sectors such as information technology and smaller companies underperformed. Tokyo equities fell 3.81% in sterling as investors assessed early indications that Japan's consumption tax increase would depress consumer spending. In Europe, growing expectations that the European Central Bank would announce further policy action, including quantitative easing, resulted in Europe ex-UK equities gaining 0.46% in sterling. UK gilts and sterling corporate bonds gained 0.70% and 1.28% in response to heightened political tension. The FP Brompton Global Income Fund gained 0.40% in April against 0.36% for the sector. At 30 April, the projected yield† was 2.67%.
