Fund manager's commentary

Currency movements contributed to gains for global equities and bonds of 2.88% and 0.22% respectively in sterling as the pound fell 1.81% against the dollar. The pound weakened as UK headline inflation fell in March for the second consecutive month and figures showed a slowdown in first-quarter economic growth. Investors concluded an early Bank of England base rate rise was less likely although weather-related weakness in economic data may prove transitory. UK equities outperformed, rising 6.77%. The EF Brompton Global Growth Fund's UK equity fund allocation increased through an addition to the Schroder Recovery holding. Aberforth UK Smaller Companies was the best performer, rising 7.36% while UK smaller companies rose 5.73%. Oil prices rose 7.78% in sterling as Middle East political risks increased following US military intervention in Syria and growing expectations that President Trump would not endorse the Iran nuclear accord. Goldman Sachs India Equity gained 6.51%, outperforming the 6.04% rise in sterling for Indian equities, which shrugged off the impact of higher oil prices. Sterling hedging helped GLG Japan CoreAlpha, which returned 6.05%, outperforming the 2.50% gain for Japanese equities in sterling terms. Sterling hedging contributed, however, to falls for Templeton Emerging Markets Bond and Legg Mason Western Asset Macro Opportunities Bond of 1.12% and 2.20% respectively. Within the portfolio's alternative allocation, Man GLG European Mid-Cap Equity Alternative, a daily-traded long/short equity fund, replaced Trojan, which has a multi-asset approach. The EF Brompton Global Growth Fund rose 3.00%† in April while the sector rose 3.13%.

Investment policy

The Fund will invest mainly in collective investment schemes, exchange traded funds and unregulated collective investment schemes (which include limited partnerships) and may also include transferable securities (including investment trusts and similar instruments), money-market instruments, fixed income instruments, deposits and foreign exchange contracts.

It is expected that equity funds will typically make up the most significant part of the Fund's assets, with the aim of achieving the Fund's objective. However, investments will not be confined to any particular sector.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets. The Fund may utilise derivatives for the purposes of efficient portfolio management.
