Fund manager's commentary

The European Central Bank (ECB) commenced quantitative easing and committed to purchase at least €1.1 trillion of assets by late 2016. Annualised eurozone prices showed a 0.6% drop in January and confirmed the necessity for further monetary support. Europe ex-UK equities rose 4.32% in sterling. Investors remained sanguine despite the electoral success of Greece's anti-austerity Syriza party. Fidelity Germany gained 5.72%, making it the best-performing Europe ex-UK equity fund within the FP Brompton Global Opportunities Fund. Global equities lagged mainland European equities, rising 2.22%, but Fundsmith Equity, which focuses on undervalued companies with solid earnings and balance sheets, outperformed the average, rising 3.70%. US equities underperformed, rising 0.70% as the divergent paths of monetary policy between the Federal Reserve and other major central banks became increasingly apparent. ECB stimulus and cheaper energy benefited Asian equities, leading to a 7.04% gain for Hermes Asia ex Japan. Falling inflation and a further 7.12% retreat in the oil price led to gains of 4.57% and 5.05% respectively from gilts and sterling corporate bonds. F&C Property Growth and Income gained 5.16% as other higher-yielding investments such as commercial property also benefited from the search for income. The Swiss National Bank's decision to break Switzerland's currency link to the euro roiled currency markets. The euro fell 3.19% against sterling but the dollar rose 3.82%. The gold price rose sharply. Blackrock Gold & General was the portfolio's best performer, recovering 11.91%. The FP Brompton Global Opportunities Fund gained 2.53% in January while the sector rose 2.20%. Financial data source: Thomson Reuters 31 January 2015

Investment policy

The Fund will principally invest in collective investment schemes, exchange-traded funds and unregulated collective investment schemes (which include limited partnerships). The Fund may also invest in investment trusts (and similar instruments) and other transferable securities, money-market instruments, fixed income instruments, deposits and foreign exchange contracts. Investments will not be confined to any particular sector. Although the Fund will usually be invested across a range of asset classes, in certain market conditions, the fund manager may decide to hold up to 100% in equity markets. This would be for a limited period and only in exceptional circumstances.

The Fund may also hold, on a temporary basis, all or part of its assets in cash or other ancillary liquid assets. The Fund may utilise derivatives for the purposes of efficient portfolio management.
