The other global equity investments lagged, with the Polar Capital holdings, Healthcare Opportunities and Global Technology, rising only 5.13% and 5.22% respectively due to their growth focus while the iShares Gold Producers ETF fell 10.27% as bullion prices weakened. UK equities outperformed, rising 13.11% as cyclical stocks rose and EU trade talks appeared to progress. Within the portfolio, GLG Undervalued Assets was built into a significant holding. BlackRock European Dynamic did better, up 14.07%, but Threadneedle European Smaller Companies lagged, rising 9.74%. Investment objective & policy

The objective of the Fund is to provide maximum capital growth.

The Fund will seek to achieve its objective from an actively managed and diversified portfolio of collective investment schemes (including investment trusts) with exposure to underlying assets such as equities, bonds, money market instruments, property and commodities. The Investment Adviser will not be constrained by underlying asset type or geographical split of the Fund's portfolio. The Fund may be invested up to 100% in schemes investing in equity securities, in appropriate market conditions.

The use of derivatives is not permitted but borrowing of up to 10% of the Fund's net asset value will be permitted on a temporary basis. The Fund may invest in hedged share classes of underlying funds.

Although the Fund will normally remain fully invested, the property of the Fund may consist of up to 10% cash or near cash where this may be reasonably regarded as necessary in order to enable the pursuit of the Fund's objective, settlement of redemptions of units and the efficient management of the Fund in accordance with its objectives or other purposes which may be reasonably regarded as ancillary to the objectives of the Fund.

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
