The Federal Reserve and Bank of England kept their official interest rates on hold but the European Central Bank raised its by a quarter percentage point. Oil rose 14.02% in sterling as some Opec members cut production despite robust demand. Above-target inflation and resilient economic growth raised fears that rates might stay higher for longer. Sterling fell 3.68% against the dollar, translating a local-currency fall for global bonds into a 0.79% rise in sterling. UK government bonds fell 0.98% but sterling corporate bonds rose 0.16%. Within the WAY Flexible Global Growth Portfolio, sterling hedging left Redwheel Asia Convertibles down 1.17% but Schroder Strategic Credit rose 0.60%. The UK stockmarket outperformed, up 2.33%, but smaller stocks lagged, down 1.26%. Within the portfolio, Man GLG Undervalued Assets outperformed, rising 2.67%, and the holding was increased. Equities in emerging markets and Asia excluding Japan also outperformed, up 1.14% and 1.07% respectively in sterling. Within the portfolio, Stewart Investors Indian Subcontinent gained 5.56% but Vietnam Enterprise Investments and Mobius Investment Trust fell 1.98% and 1.48% respectively. With bullion weak, the iShares Gold Producers exchange-traded fund fell 4.32% and the holding was reduced. Among other global holdings, Polar Capital Global Technology fell 2.15%, lagging the 0.44% fall in sterling for global equities, but Polar Capital Global Insurance gained 4.26% and was topped up because higher premiums and returns on cash may boost profits for some insurers. The WAY Flexible Global Growth Portfolio fell 0.55% in September while the sector fell 0.63%.

Investment objective & policy

The objective of the Fund is to provide maximum capital growth.

The Fund will seek to achieve its objective from an actively managed and diversified portfolio of collective investment schemes (including investment trusts) with exposure to underlying assets such as equities, bonds, money market instruments, property and commodities. The Investment Adviser will not be constrained by underlying asset type or geographical split of the Fund's portfolio. The Fund may be invested up to 100% in schemes investing in equity securities, in appropriate market conditions.

The use of derivatives is not permitted but borrowing of up to 10% of the Fund's net asset value will be permitted on a temporary basis. The Fund may invest in hedged share classes of underlying funds.

Although the Fund will normally remain fully invested, the property of the Fund may consist of up to 10% cash or near cash where this may be reasonably regarded as necessary in order to enable the pursuit of the Fund's objective, settlement of redemptions of units and the efficient management of the Fund in accordance with its objectives or other purposes which may be reasonably regarded as ancillary to the objectives of the Fund.

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
