WAY Flexible Global Growth Portfolio

A unit trust managed by Brompton Asset Management

Fund manager's commentary

Global equities gained 6.96% in sterling on news of an Iran-US ceasefire and peace talks but bonds fell 1.75% as leading central banks left their official interest rates on hold amid speculation that rates may remain elevated because higher energy prices could increase inflation despite lowering economic growth. US stocks outperformed, up 7.23% in sterling, led higher by technology stocks, up 15.60% on strong demand for the beneficiaries of artificial intelligence infrastructure investment. Within the WAY Flexible Global Growth Portfolio, HSBC S&P 500 Equal Weight Equity lagged, however, up only 4.16% because of its relatively low technology weighting. Equities in Asia excluding Japan and emerging markets also outperformed, up 12.87% and 11.34% in sterling respectively, led higher by technology stocks, including some of the world's leading semiconductor manufacturers. Within the portfolio, Man Asia (ex-Japan) Equity did best, up 14.37%, but Redwheel Next Generation Emerging Market Equity gained only 1.96% because of its relatively low technology allocation. The allocation to Asia excluding Japan and emerging markets increased through the addition of Chikara Indian Subcontinent and Pacific North of South Global Emerging Markets Equity. In the UK, where equities lagged, rising only 2.69%, Artemis UK Select outperformed, rising 5.05%. Within the bond allocation, the iShares Treasury Bond 1-3 Years exchange-traded fund and Pimco Global Low Duration Real Return fell 2.73% and 1.92% respectively as the dollar weakened 2.95% against sterling. Trojan, a lower-risk multi-asset investment, gained 1.98%. The WAY Flexible Global Growth Portfolio rose 4.53% in April while the sector rose 4.97%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to provide maximum capital growth.

The Fund will seek to achieve its objective from an actively managed and diversified portfolio of collective investment schemes (including investment trusts) with exposure to underlying assets such as equities, bonds, money market instruments, property and commodities. The Investment Adviser will not be constrained by underlying asset type or geographical split of the Fund's portfolio. The Fund may be invested up to 100% in schemes investing in equity securities, in appropriate market conditions.

The use of derivatives is not permitted but borrowing of up to 10% of the Fund's net asset value will be permitted on a temporary basis. The Fund may invest in hedged share classes of underlying funds.

Although the Fund will normally remain fully invested, the property of the Fund may consist of up to 10% cash or near cash where this may be reasonably regarded as necessary in order to enable the pursuit of the Fund's objective, settlement of redemptions of units and the efficient management of the Fund in accordance with its objectives or other purposes which may be reasonably regarded as ancillary to the objectives of the Fund.

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
