WAY Flexible Global Growth Portfolio

A unit trust managed by Brompton Asset Management

Fund manager's commentary

The Federal Reserve left its interest rate unchanged because US inflation remained elevated but the European Central bank made a quarter percentage point cut and the Bank of England followed suit in early February. Eurozone inflation is expected to be close to target in 2025 but UK inflation may prove sticky. Global equities rose 4.20% in sterling after outperformance by equities in Europe excluding the UK, up 8.26% in sterling, and in the UK, up 5.54%. The WAY Flexible Global Growth Portfolio's relatively low Europe ex-UK equity allocation and underperformance by BlackRock European Dynamic, up 8.09%, hurt performance. The Lightman European holding was increased to lift the portfolio's regional exposure. In the UK, the iShares FTSE 100 exchange-traded fund (ETF) gained 6.19% and the portfolio's allocation to lowly-valued larger UK companies was increased by adding to the holding while smaller company investments were reduced. Artemis UK Special Situations underperformed, up 3.94%, because of its bias towards small and medium-sized companies; small companies rose just 1.50% as investors responded to a BoE forecast of economic growth of just 0.75% in 2025 and peak inflation of 3.7%. Global bonds rose 1.36% in sterling. Within the portfolio, the sterling-hedged holding in Pimco Global Low Duration Real Return and TwentyFour Strategic Income rose 1.09% and 0.90% respectively. The iShares Gold Producers ETF was the best performer, up 15.35% in response to strong bullion prices as tariff threats spooked investors. The WAY Flexible Global Growth Portfolio rose 3.15% in January while the sector rose 3.54%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to provide maximum capital growth.

The Fund will seek to achieve its objective from an actively managed and diversified portfolio of collective investment schemes (including investment trusts) with exposure to underlying assets such as equities, bonds, money market instruments, property and commodities. The Investment Adviser will not be constrained by underlying asset type or geographical split of the Fund's portfolio. The Fund may be invested up to 100% in schemes investing in equity securities, in appropriate market conditions.

The use of derivatives is not permitted but borrowing of up to 10% of the Fund's net asset value will be permitted on a temporary basis. The Fund may invest in hedged share classes of underlying funds.

Although the Fund will normally remain fully invested, the property of the Fund may consist of up to 10% cash or near cash where this may be reasonably regarded as necessary in order to enable the pursuit of the Fund's objective, settlement of redemptions of units and the efficient management of the Fund in accordance with its objectives or other purposes which may be reasonably regarded as ancillary to the objectives of the Fund.

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
