WAY Flexible Global Growth Portfolio

A unit trust managed by Brompton Asset Management

Fund manager's commentary

Global equities rose 0.78% in sterling as Middle East peace talks contributed to a 17.19% oil price fall despite Iranian attacks on ships in the Strait of Hormuz. Equities in emerging markets and Asia excluding Japan underperformed, up 0.17% and 0.29% in sterling respectively, but Indian stocks did better, rising 3.12% in response to consumption-led economic growth. Within the WAY Flexible Global Growth Portfolio, Chikara Indian Subcontinent outperformed, up 7.80%, and the holding was increased. Japanese equities also lagged, up 0.52% in sterling, and Nippon Active Value did even worse, falling 2.44%. The portfolio's allocation was increased through additional investment in Baillie Gifford Japanese Smaller Companies, which may benefit from pro-growth reforms by Sanae Takaichi, the prime minister. Japanese exports have benefited from yen weakness stemming from ultra-loose monetary policy but rising interest rates may stabilise the yen and increase the attractions of domestic investment. Technology stocks fell 0.75% in sterling as the SpaceX flotation tapped investors for cash. Within the US allocation, the Xtrackers S&P 500 exchange-traded fund rose 0.57% but the Xtrackers S&P 500 Equal Weight ETF did better, rising 3.92% thanks to its relatively-low technology sector weighting. Equities in the UK lagged, rising just 0.50% in sterling, but the portfolio's UK equity holdings outperformed, with Artemis UK Select strongest, up 4.31%. Among the portfolio's global holdings, Polar Capital Global Technology, up 3.37%, was aided by investor enthusiasm for artificial intelligence infrastructure suppliers. The WAY Flexible Global Growth Portfolio rose 0.73% in June while the sector rose 0.26%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to provide maximum capital growth.

The Fund will seek to achieve its objective from an actively managed and diversified portfolio of collective investment schemes (including investment trusts) with exposure to underlying assets such as equities, bonds, money market instruments, property and commodities. The Investment Adviser will not be constrained by underlying asset type or geographical split of the Fund's portfolio. The Fund may be invested up to 100% in schemes investing in equity securities, in appropriate market conditions.

The use of derivatives is not permitted but borrowing of up to 10% of the Fund's net asset value will be permitted on a temporary basis. The Fund may invest in hedged share classes of underlying funds.

Although the Fund will normally remain fully invested, the property of the Fund may consist of up to 10% cash or near cash where this may be reasonably regarded as necessary in order to enable the pursuit of the Fund's objective, settlement of redemptions of units and the efficient management of the Fund in accordance with its objectives or other purposes which may be reasonably regarded as ancillary to the objectives of the Fund.

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
