WAY Flexible Global Growth Portfolio

A unit trust managed by Brompton Asset Management

Fund manager's commentary

Global equities and global bonds rose 4.97% and 1.49% in sterling respectively as investors responded favourably to the Republicans' clean sweep in the presidential and congressional elections. Donald Trump promised 25% tariffs on goods from Mexico and Canada and 35% from China. Trump's policies may prove inflationary and lead to a stronger dollar and interest rates remaining higher for longer but US stocks outperformed, rising 7.09% in sterling on hopes of tax cuts and deregulation. The WAY Flexible Global Growth Portfolio's US equity allocation increased through the purchase of the iShares S&P 500 Equal Weight exchange-traded fund (ETF). This holds equal amounts of America's largest 500 stocks unlike conventional market value-weighted passive investments, which are currently dominated by large technology companies. Equities in emerging markets and Asia excluding Japan lagged, down 2.48% and 2.17% respectively in sterling. Within the portfolio, Stewart Investors Indian Subcontinent outperformed, rising 1.32%, but Baillie Gifford Pacific fell 2.47%. Within the global equity allocation, Polar Capital Global Insurance did best, rising 8.79%. Commercial insurers are benefiting from attractive returns on cash and higher insurance premia because of a scarcity of underwriting capital and increased natural disasters. Polar Capital Global Technology also outperformed, up 6.59%, but the iShares Gold Producers ETF fell 5.48% as gold weakened. Within the bond allocation, inflation protection was increased through the addition to the sterling-hedged Fidelity Global Inflation-Linked Bond holding while Janus Henderson Strategic Bond was reduced. The WAY Flexible Global Growth Portfolio rose 2.10% in November while the sector rose 2.52%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to provide maximum capital growth.

The Fund will seek to achieve its objective from an actively managed and diversified portfolio of collective investment schemes (including investment trusts) with exposure to underlying assets such as equities, bonds, money market instruments, property and commodities. The Investment Adviser will not be constrained by underlying asset type or geographical split of the Fund's portfolio. The Fund may be invested up to 100% in schemes investing in equity securities, in appropriate market conditions.

The use of derivatives is not permitted but borrowing of up to 10% of the Fund's net asset value will be permitted on a temporary basis. The Fund may invest in hedged share classes of underlying funds.

Although the Fund will normally remain fully invested, the property of the Fund may consist of up to 10% cash or near cash where this may be reasonably regarded as necessary in order to enable the pursuit of the Fund's objective, settlement of redemptions of units and the efficient management of the Fund in accordance with its objectives or other purposes which may be reasonably regarded as ancillary to the objectives of the Fund.

The Fund's benchmark is IA Flexible Investment. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
