## WAY Global Cautious Portfolio

An OEIC managed by  
Brompton Asset Management

### Fund manager's commentary

UK equities rose 3.00%, beating the 2.24% gain for global equities in sterling following a double dose of good news as Astra-Zeneca's Covid-19 vaccine was approved in the UK and an EU-UK trade deal averted a hard Brexit. The WAY Global Cautious Portfolio's three actively-managed significant UK equity holdings outperformed. Strong performance from cyclical stocks aided GLG Undervalued Assets, up 4.81%. Smaller companies were particularly strong, up 6.80% and contributing to Chelverton UK Equity Growth's 7.05% return. In Europe excluding the UK, where equities returned 2.07% in sterling, significant holdings outperformed, with BlackRock European Dynamic doing best, up 3.96%. The dollar fell 2.33% against sterling, contributing to the 1.02% fall by global bonds. UK government bonds, however, returned 1.55% while sterling corporate and high-yield bonds gained 1.67% and 1.04% respectively. Among the portfolio's significant bond investments, the sterling-hedged RWC Asia Convertibles holding and TwentyFour Strategic Income returned 4.47% and 1.12% respectively. Equities in Asia excluding Japan gained 4.35% in sterling, aided by dollar weakness, but Baillie Gifford Pacific lagged, up 3.06%. Among the significant global equity investments, Polar Capital Global Technology outperformed, gaining 2.56%, but the iShares Edge MSCI World Value Factor exchange-traded fund lagged, gaining 1.95%. All but one of the significant alternative investments rose, with Man GLG UK Absolute Value performing best, up 1.25%. Gold rose 3.94% in sterling, leading to a 4.78% gain by the iShares Physical Gold exchange-traded commodity. The WAY Global Cautious Portfolio rose 1.52%† in December while the sector gained 1.34%.

## WAY Global Cautious Portfolio (continued)

An OEIC managed by  
Brompton Asset Management

### Investment objective & policy

The objective of the Fund is total investment return against the IA Mixed Investment 0-35% Shares sector over a 3 year rolling period. Capital invested in the Fund is at risk and there is no guarantee that the investment objective will be met over the 3 year rolling period or in respect of any other period.

The Fund will seek to achieve its objective through conservative investment in an actively managed and diversified portfolio of collective investment schemes, investment trusts, other listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest up to 35% of its portfolio in equity securities. The Fund may invest up to 20% in unregulated collective investment schemes.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

Derivatives will not be used. Currency hedging transactions, including investing in hedged share classes, may be used where appropriate, in order to mitigate against the effects of changes in currency exchange rates against the Fund's base currency which is pounds sterling. Borrowing of up to 10% of the Fund's net asset value will be permitted.

The Fund's benchmark is IA Mixed Investment 0-35% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
