Fund manager's commentary

The Federal Reserve and Bank of England left their official interest rates unchanged with US inflation higher than expected but the European Central Bank cut its rate by a quarter percentage point in early June because eurozone inflation prospects had improved. Equities in Europe excluding the UK outperformed, rising 3.73% in sterling against 2.40% for global equities. The WAY Global Cautious Portfolio's underweight allocation to Continental Europe hurt performance. US stocks also outperformed, rising 3.22% in sterling, with technology stocks particularly strong, rising 7.20% following results from Nvidia, the artificial intelligence microchip designer. Within the portfolio, Polar Capital Global Technology rose 4.98%. Among other global holdings, Polar Capital Global Insurance also did well, up 4.70%. Stocks in the UK, where voters head to the polls in July, gained 2.43%, with small stocks doing best, up 6.23%, aided by takeover activity showing value in the sector. Within the portfolio, Artemis Special Situations and Man GLG Undervalued Assets rose 3.88% and 3.45% respectively. Chelverton UK Equity Growth, which has a small-company focus, was increased. Japanese stocks lagged, down 0.38% in sterling partly because of yen weakness. The Japanese allocation was reduced through the partial sale of Man GLG Japan Core Alpha. Global bonds fell 0.36% in sterling but UK government bonds and sterling corporate bonds rose 0.78% and 0.91% respectively. Within the portfolio, the sterling-hedged Redwheel Asia Convertibles holding and TwentyFour Strategic Income rose 1.55% and 1.41% respectively. The WAY Global Cautious Portfolio rose 0.76%† in May while the sector rose 0.61%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is total investment return against the IA Mixed Investment 0-35% Shares sector over a 3 year rolling period. Capital invested in the Fund is at risk and there is no guarantee that the investment objective will be met over the 3 year rolling period or in respect of any other period.

The Fund will seek to achieve its objective through conservative investment in an actively managed and diversified portfolio of collective investment schemes, investment trusts, other listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest up to 35% of its portfolio in equity securities. The Fund may invest up to 20% in unregulated collective investment schemes.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

Derivatives will not be used. Currency hedging transactions, including investing in hedged share classes, may be used where appropriate, in order to mitigate against the effects of changes in currency exchange rates against the Fund's base currency which is pounds sterling. Borrowing of up to 10% of the Fund's net asset value will be permitted.

The Fund's benchmark is IA Mixed Investment 0-35% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
