WAY Global Growth Portfolio Fund

Investment Manager's Report For the six months ended 30 September 2024 (unaudited)

Investment Objective

The investment objective of the Fund is to seek a high level of capital growth over a period of at least 5 years.

Investment Policy

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 40% and 85% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

Investment Review

The WAY Global Growth Portfolio Fund (E Accumulation share class) rose 1.83% over the six months to 30 September 2024 while the IA Mixed Investment 40-85% Shares Index rose 3.34%.

Leading western central banks began to reduce interest rates during the period under review but the pound's strength muted returns among the major asset classes, with global equities up 3.53% and bonds down 0.36% respectively in sterling. Retail price inflation eased further, with September figures for the US, UK and eurozone down at 2.4%, 1.7% and 1.7% respectively although services inflation was higher.

The Federal Reserve cut its policy rate by half a percentage point to 4.75-4.5%, the Bank of England cut Bank rate by a quarter point to 5% while the European Central Bank cut its main policy rate twice, taking it to 3.5%. Leading indicators suggested some major economies would continue to grow but eurozone indicators implied contraction. Middle East tensions escalated but oil fell 15.81% in sterling as global economic growth weakened.

US stocks returned 3.99% in sterling, led by technology stocks, up 7.82% as investors enthused about artificial intelligence. Within the portfolio, profits were taken through the partial sale of Polar Capital Global Technology and sale of the iShares Nasdaq 100 exchange-traded fund (ETF). Technology stocks may perform well in the longer term but stretched valuations may generate short-term weakness.

Within the global equity allocation, Dimensional Global Targeted Value, which has a small-company bias, fell 0.60% and the holding was reduced because smaller companies are typically more sensitive to economic changes and may underperform as growth slows. First Sentier Global Listed Infrastructure was increased. High interest rates had negatively affected infrastructure stock valuations but monetary easing may reverse this.

In addition, governments are encouraging power companies to achieve decarbonisation. This will involve significant extra capital investment, on which regulators will allow these companies to generate returns. Polar Capital Global Insurance, which focuses on non-life insurers benefiting from rising premiums, was also increased.

Labour won a landslide UK general election victory. The UK stockmarket, which has heavy weightings in cyclical sectors such as financials and energy, returned 5.79%, led higher by smaller companies, up 10.57%. With UK equities appearing attractively valued, supported by improving economic prospects, the UK equity allocation was increased, partly by way of a new holding in Fidelity Special Situations, a value-oriented investment.

WAY Global Growth Portfolio Fund

Investment Manager's Report (continued) For the six months ended 30 September 2024 (unaudited)

Investment Review (continued)

Large cap value stocks in Japan did well in early 2024 thanks to yen weakness and the Tokyo Stock Exchange's corporate governance reforms and profits were taken from Man GLG Japan CoreAlpha. Japanese companies should benefit from digital transformation but the Bank of Japan's interest rate hikes and the yen strength that followed may weigh on investor sentiment.

The portfolio benefitted from its overweight position in emerging market equities, up 7.78% in sterling, fuelled by the 24.78% rebound in Chinese stocks as China announced a stimulus package including interest rate cuts, state intervention in the stockmarket and measures to aid over-indebted property companies. Redwheel Next Generation Emerging Markets Equity was added.

Emerging market valuations ended the period significantly below those of developed markets and US monetary easing may continue to weaken the dollar. This typically provides a tailwind. The International Monetary Fund predicts 4.2% economic growth for emerging markets in 2025 against 1.8% for developed economies.

UK government bonds and sterling investment-grade bonds and high-yield bonds returned 1.29%, 2.13% and 5.79% respectively. Global government bonds, which provide an attractive low-risk yield, were increased. The sterling-hedged holding in Pimco Global Low Duration Real Return was increased because core inflation may remain sticky. In a US election year, bipartisan support for Sino-US trade restrictions may also be inflationary.

The iShares Physical Gold exchange-traded commodity gained 11.79% in sterling. Gold tends to act as a safe-haven diversifying investment, proving defensive during periods of heightened uncertainty and weakness in the major asset classes.

Lower interest rates may provide a tailwind for equities and bonds. Longer-dated government bonds offer low-risk positive real returns while shorter-dated inflation-linked bonds provide protection should inflation remain higher than expected. Infrastructure and commercial insurance stocks on low valuations provide diversification and may prove more defensive. With US politics increasingly polarised, political risk may be a significant factor in markets.

- The lowest category does not mean 'risk free'.
- The Fund appears as a "5" on the scale. This is because the Fund by its nature has exposure to equity securities which can experience high rises and falls in values.

Risk Warning

An investment in an Open-Ended Investment Company should be regarded as a long term investment. Investors should be aware that the price of Shares and the income from them may fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency of a fund are subject to fluctuation in exchange rates, which may be favourable or unfavourable.

Accounting Basis, Policies and Valuation of Investments

Basis of accounting

The Interim Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 "The Financial Reporting Standards Applicable in the UK and Republic of Ireland", the Statement of Recommended Practice ("SORP") for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014, Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the FCA's Collective Investment Schemes Sourcebook ("COLL"), the FCA's Investment Funds Sourcebook ("FUND") and the Fund's Instrument of Incorporation.

The accounting policies applied are consistent with those of the audited annual Financial Statements for the year ended 31 March 2024 and are described in those Financial Statements. In this regard, comparative figures from previous periods are prepared to the same standards as the current period, unless otherwise stated.

As described in the Certification of Financial Statements by Directors of the ACD on page 4, the ACD continues to adopt the going concern basis in the preparation of the Financial Statements of the Funds.

Basis of valuation of investments

Market value is defined by the SORP as fair value which is the bid value of each security.

Collective Investment Schemes are valued at quoted bid prices for dual priced funds and at quoted prices for single priced funds, on the last business day of the accounting period.

All investments are recognised and derecognised on trade date, and any trades that occur between valuation point and close of business are included in the Financial Statements.

Non-observable entity specific data is only used where relevant observable market data is not available. Typically this category will include single broker-priced instruments, suspended/unquoted securities, private equity, unlisted close-ended funds and open-ended funds with restrictions on redemption rights.

As at the balance sheet date the WAY Global Growth Portfolio Fund holds 331,333 shares in Better Capital. Our approach to the fair valuation of this asset is included below.

Better Capital PCC Ltd delisted in June 2020 and will be wound up. The asset is currently priced at zero under the instruction of the Fair Value Pricing Committee of the ACD.

Under the Alternative Investment Fund Managers Directive ("AIFMD"), acting as the Alternative Investment Fund Manager ("AIFM"), WAY Fund Managers Limited is required to disclose how those whose actions have a material impact on the Fund are remunerated.

The remuneration strategy across WAY Fund Managers Limited is governed by the WAY Fund Managers Limited Board and WAY Fund Managers Limited has chosen not to establish a Remuneration Committee. The WAY Fund Managers Limited Board has established a Remuneration Policy designed to ensure the AIFM Remuneration Code in the UK Financial Conduct Authority's handbook is met proportionately for all AIFM Remuneration Code Staff.

WAY Fund Managers Limited considers its activities as non complex due to the fact that regulation limits the AIF strategies conducted and the scope of investment in such a way that investor risk is mitigated. The discretion of WAY Fund Managers Limited and the portfolio manager is strictly controlled within certain pre-defined parameters as determined in the prospectus of each Alternative Investment Fund.

In its role as an AIFM, WAY Fund Managers Limited deems itself as lower risk due to the nature of the activities it conducts. WAY Fund Managers Limited does not pay any form of variable remuneration currently. Therefore WAY Fund Managers Limited has provided a basic overview of how staff whose actions have a material impact on the Fund are remunerated.

The only material change to the adopted remuneration policy, since the previous year end, is the identification of new risk takers and inclusion of delegates required by the AIFMD.

September 24	Number of Beneficiaries	Total remuneration paid (GBP)	Fixed remuneration (GBP)	Variable remuneration paid (GBP)	Carried interest paid by the AIF (GBP)
Total remuneration paid by WFM during the financial year	17	633,181	633,181	0	0
Remuneration paid to employees of WFM who have a material impact on the risk profile of the AIF	6	253,258	253,258	0	0

The table above is unaudited.

Due to the size and structure of WAY Fund Managers Limited, it is determined that employees of the AIFM who have a material impact on the risk profile of the AIF include the Board, Head of Finance and Head of Risk and Compliance.

The delegated investment manager is subject to regulatory requirements on remuneration that WAY Fund Managers Limited deem to be equally as effective as those detailed in the AIFMD, which would include the Capital Requirements Directive or Markets in Financial Instruments Directive.
