WAY Global Growth Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

Global equities rose 0.94% in sterling while bonds fell 1.07%. The dollar fell 1.98% against the pound while gold rose 6.66% in sterling in response to geopolitical uncertainties as US forces kidnapped Venezuela's president, Nicolas Maduro, and US government lawyers opened a criminal investigation into Jerome Powell, the Federal Reserve chairman, over Fed building costs. The iShares Physical Gold exchange-traded commodity was the WAY Global Growth Portfolio's best performer, up 13.34%. The portfolio also benefitted from its relatively high allocation to equities in emerging markets and Asia excluding Japan, which rose 6.70% and 6.06% respectively in sterling, buoyed by dollar weakness. Within the portfolio, Baillie Gifford Pacific and Baillie Gifford Emerging Markets Growth outperformed, rising 11.71% and 11.40% respectively, but Man Asia (ex-Japan) Equity gained only 4.80%. In Japan, where equities rose 4.20% in sterling, Nippon Active Value outperformed, up 6.76%. UK equities outperformed, gained 3.25%, while equities in Europe excluding the UK gained 2.19% in sterling. Among Europe ex UK holdings, the iShares Edge MSCI Europe Value exchange-traded fund (ETF) outperformed, rising 3.56%. US stocks lagged, down 0.56% in sterling, led lower by technology stocks, down 2.06%, but HSBC S&P 500 Equal Weight Equity rose 0.09%, shielded by its relatively low technology sector weighting. Among the global bond holdings, the sterling-hedged iShares \$ TIPS 0-5 Years ETF holding rose 0.57%. Among UK bonds, Jupiter Dynamic Bond and Aegon Strategic Bond gained 1.81% and 1.11% respectively. The WAY Global Growth Portfolio rose 3.11% in January while the sector rose 1.64%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek a high level of capital growth over a period of at least 5 years.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 40% and 85% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed investment 40-85% shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.

*Source: LSEG Lipper, NAV-NAV, sterling. The E Accumulation share class launched on 31 December 2012. Performance history prior to that date is that of the B Acc share class. The backdated performance is based upon the actual returns of the B Acc share class with no alteration for differing fee levels between these share classes. † Brompton took over management of the fund on 1 May 2017. †† Prior to October 2018, the Fund was included in the IA Flexible Investment sector. At times, this may have enabled the Fund to hold more or less equities than peers in the IA Mixed Investment 40-85% Shares sector, which may have led to better comparative performance. Our review of the comparative data does not show that there is a material difference in the performance of the respective sectors.
