ISIN code	GB00BQNKFK38

C class shares are available for WTL investors paying trust fees directly to WTL.

WAY MA Cautious Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

Global equities gained 6.96% in sterling on news of an Iran-US ceasefire and talks but bonds fell 1.75% as leading central banks left their official interest rates on hold amid speculation that rates may remain elevated because higher energy prices could increase inflation despite lowering economic growth. US stocks outperformed, up 7.23% in sterling, led higher by technology stocks, up 15.60% on strong demand for the beneficiaries of artificial intelligence infrastructure investment. Equities in Asia excluding Japan and emerging markets also outperformed, up 12.87% and 11.34% in sterling respectively, led higher by technology stocks, including some of the world's leading semiconductor manufacturers. Man Asia (ex-Japan) Equity and Pacific North of South Global Emerging Markets Equity were the WAY MA Cautious Portfolio's strongest significant holdings, rising 14.37% and 11.97% respectively. The allocation to Asia excluding Japan and emerging markets increased, with Chikara Indian Subcontinent added and the Redwheel Next Generation Emerging Markets Equity holding significantly increased. In Europe excluding the UK, where equities gained 4.69% in sterling, Jupiter European Select outperformed, rising 6.38%, but Lightman European fell 0.05%. Within the global bond allocation, the sterling-hedged Pimco Global Low Duration Real Return holding proved defensive in the face of higher energy prices, rising 1.09%, but the iShares Treasury Bond 1-3 Years exchange-traded fund fell 2.73% as the dollar weakened 2.95% against sterling. Among UK bond holdings, Jupiter Dynamic Bond rose 1.48%. Trojan, a lower-risk multi-asset investment, gained 1.98%. The WAY MA Cautious Portfolio rose 2.75% in April while the sector rose 3.29%.

BROMPTON

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
