ISIN code	GB00BQNKFK38

C class shares are available for WTL investors paying trust fees directly to WTL.

WAY MA Cautious Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

The US Treasury announced increased liquidity support for the bond market. Purchases of longer-dated US government bonds will at least double to curb yields and the cost of funding public sector debt. US inflation rose to 3.4% in July according to the latest data because the Iran War has increased the oil price, which gained 2.15% in sterling in August. Global bonds fell 0.29% in sterling as the dollar fell 0.74% against the pound. Within the WAY MA Cautious Portfolio, Jupiter Dynamic Bond and Schroder Strategic Credit returned 0.59% and 0.49% respectively but the iShares \$ Treasury Bond 0-1 Year exchange-traded fund fell 0.45%. Geopolitical uncertainty fuelled bullion prices and the portfolio's iShares Physical Gold exchange-traded commodity holding, up 12.46%, was increased. Stronger gold prices also contributed to 1.78% gain for Trojan, which has a significant allocation to gold. Technology stocks gained 4.17% in sterling, outperforming the 1.93% rise for global equities. Within the portfolio, Polar Capital Global Technology, which has big holdings in semiconductors, components and other hardware, gained 3.54%. Japanese stocks outperformed, up 2.78% in sterling. Within the portfolio, Baillie Gifford Japanese Smaller Companies and Man Japan CoreAlpha outperformed, rising 6.00% and 3.02 respectively. In emerging markets, where equities gained 2.63% in sterling, Redwheel Next Generation Emerging Markets Equity outperformed, rising 6.44%, but Pacific North of South Global Emerging Markets Equity lagged, falling 0.59%. Atlas Global Infrastructure was added to the global equity allocation. The WAY MA Cautious Portfolio rose 1.72% in August while the sector rose 1.32%.

BROMPTON

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
