Fund manager's commentary

The Federal Reserve left its official interest rate unchanged because US inflation remained elevated but the European Central bank made a quarter percentage point cut and the Bank of England followed suit in early February. Eurozone inflation is expected to be close to target in 2025 but UK inflation may prove sticky. Global equities rose 4.20% in sterling after outperformance by equities in Europe excluding the UK, up 8.26% in sterling, and in the UK, up 5.54%. The WAY MA Cautious Portfolio's lack of exposure to Europe ex-UK equities hurt performance. Lightman European, value-focused investment, was increased to lift the regional exposure. In the UK, the iShares FTSE 100 exchange-traded fund (ETF) gained 6.19% and the holding was increased to lift the allocation to larger UK companies trading on low valuations. Man Undervalued Assets, up 3.69%, underperformed because of its bias towards small and medium-sized companies and the holding was reduced; small companies rose just 1.50% as investors responded to a BoE forecast of economic growth of just 0.75% in 2025 and peak inflation of 3.7%. Global bonds rose 1.36% in sterling. Within the portfolio, the sterling-hedged Fidelity Global Inflation-linked Bond holding and the Vanguard \$ Treasury Bond ETF rose 1.33% and 1.30% respectively. The sterling-hedged holding in Pimco Global Low Duration Real Return, which returned 1.09%, was increased. The iShares Physical Gold exchange-traded commodity was the best performer, up 8.55% as tariff threats spooked investors. The WAY MA Cautious Portfolio rose 2.47% in January while the sector rose 2.40%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
