| ISIN code | GB00BQNKFK38 |

C class shares are available for WTL investors paying trust fees directly to WTL.

WAY MA Cautious Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

The Federal Reserve held its policy interest rate at 4.25-4.5% because of sticky inflation and steady economic growth and the dollar rose 3.55% against sterling. US stocks outperformed, up 5.88% in sterling, led higher by technology stocks, up 9.12% as tariff negotiations assuaged investors' fears of recession. US jobs data for July, released in August, disappointed, however, with just 73,000 non-farm jobs created and figures for May and June were downgraded. Within the WAY MA Cautious Portfolio, HSBC S&P 500 Equal Weight Equity, up 5.83%, lagged because of its low weighting in technology stocks. Equities in Asia excluding Japan and emerging markets outperformed, up 6.28% and 5.64% respectively in sterling. Within the portfolio, Redwheel Next Generation Emerging Markets Equity, which has relatively-low Chinese and Indian allocations, rose 6.92% but Stewart Investors Indian Subcontinent and Man Asia (ex-Japan) Equity lagged, down 1.80% and up 4.96% respectively. UK equities lagged, up 3.83%, as did equities in Europe excluding the UK, up 0.96% in sterling. The portfolio's Europe ex-UK holdings outperformed, however, with Lightman European, strongest, up 2.70%. Global bonds fell 1.49% in dollars but rose 2.01% in sterling thanks to dollar strength. Within the portfolio, the iShares \$ Treasury Bond 0-1 Year exchange-traded fund returned 3.90% but Fidelity Index Global Government Bond fell 0.36%. Among the alternative holdings, Man Absolute Value, a UK daily-traded, long/short equity investment, fell 4.15% thanks to poor selection of long and short positions. The WAY MA Cautious Portfolio rose 2.33% in July while the sector rose 1.97%.

BROMPTON

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
