ISIN code	GB00BQNKFK38
C class shares are available for WTL investors paying trust fees directly to WTL.	

WAY MA Cautious Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

The Federal Reserve and Bank of England held their policy interest rates at 4.25-4.5% and 4.25% respectively but the European Central Bank cut its main rate by a quarter percentage point to 2%. Oil rose 7.65% in sterling on Middle East conflict but markets proved resilient, with global equities and bonds rising 2.87% and 0.27% respectively in sterling. Within the WAY MA Cautious Portfolio's bond allocation, Jupiter Dynamic Bond and TwentyFour Strategic Income returned 1.61% and 1.26% respectively but the iShares \$ Treasury Bond 1-3 Years exchange-traded fund fell 1.00%. US stocks outperformed as some tariff hikes were postponed pending talks, rising 3.41% in sterling, with technology particularly strong, up 7.69%. HSBC S&P 500 Equal Weight Equity was added to the portfolio because it should prove defensive if technology stocks falter. The dollar fell 1.59% against sterling in response to lack of tariff clarity and economic slowdown fears. This fall benefitted equities in Asia excluding Japan and emerging markets, which gained 4.51% and 4.45% respectively in sterling. The portfolio's holdings lagged, however, with Redwheel Next Generation Emerging Markets Equity and Stewart Investors Indian Subcontinent rising only 2.12% and 2.62% respectively. Equities in the UK and Europe excluding the UK lagged, rising only 0.28% and 0.64% in sterling respectively, but UK smaller companies outperformed, rising 3.05%. Within the portfolio, Artemis UK Special Situations and BGF Continental European rose 2.05% and 1.89% respectively but Lightman European fell 0.21%. The WAY MA Cautious Portfolio gained 0.88% in June while the sector gained 1.50%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
