Among the global equity holdings, Polar Capital Global Insurance bucked the negative trend, 0.32% while First Sentier Global Listed Infrastructure proved relatively defensive, down just 0.71%. UK equities outperformed, down 1.99%, as did equities in Europe excluding the UK, down 2.88% in sterling. ### Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
