WAY MA Cautious Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

Global equities and bonds fell 5.32% and 1.18% respectively in sterling while oil rose 58.35% on fears that the US-Israeli war against Iran would lift inflation, increase interest rates and lower economic growth. The WAY MA Cautious Portfolio held no investments dedicated to UK government bonds, down 4.34% because of Britain's dependence on gas imports and high government borrowing. Sterling corporate bonds fell 3.29% but TwentyFour Strategic Income, down 2.32%, benefited from conservative positioning. Within the global bond allocation, the sterling-hedged Royal London Short Duration Global Index Linked holding, down only 0.72%, proved defensive as inflation fears increased while the iShares Treasury Bond 1-3 Years exchange-traded fund (ETF) rose 1.47% as the dollar gained 1.95% against sterling. Equities in Europe excluding the UK lagged, down 8.66% in sterling, while UK equities fell 6.62%. Within the portfolio, Artemis UK Select and Jupiter European Select fell 12.41% and 8.19% respectively but Lightman European, down 3.59%, was more resilient. The portfolio suffered from its relatively-high allocation to equities in Asia excluding Japan and emerging markets, which fell 12.02% and 11.33% respectively in sterling because of Asia's reliance on energy imports. Baillie Gifford Pacific was the weakest significant holding, down 14.18%. Within the global equity allocation, First Sentier Global Listed Infrastructure, which holds cash-generative companies including beneficiaries from electrification, fell just 1.78%. Portfolio changes included the disposals of the iShares MSCI EMU ETF and the iShares Physical Gold exchange-traded commodity. The WAY MA Cautious Portfolio fell 5.76% in March while the sector fell 4.89%.

ASSET MANAGEMENT

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
