Launch date	1 November 2022
Launch price	100p
Price at 30 November 2024	117.04p
Minimum investment	£1,000
Investment management fee	0.65%
Total expense ratio	1.49%
SEDOL code	BQNKFK3
ISIN code	GB00BQNKFK38

C class shares are available for WTL investors paying trust fees directly to WTL.

WAY MA Cautious Portfolio

An OEIC managed by Brompton Asset Management

Fund manager's commentary

Global equities and bonds rose 4.97% and 1.49% in sterling respectively as investors celebrated the Republicans' clean sweep in the presidential and congressional elections. Donald Trump promised 25% tariffs on goods from Mexico and Canada and 35% from China. Trump's policies may prove inflationary and lead to a stronger dollar and interest rates remaining higher for longer but US stocks outperformed, rising 7.09% in sterling on hopes of tax cuts and deregulation. The WAY MA Cautious Portfolio's US equity allocation increased through the purchase of the iShares S&P 500 Equal Weight exchange-traded fund (ETF). This holds equal amounts of America's largest stocks unlike conventional market value-weighted passive investments, which are currently dominated by large technology companies. Equities in emerging markets and Asia excluding Japan lagged, down 2.48% and 2.17% respectively in sterling. Within the portfolio, Stewart Investors Indian Subcontinent and Redwheel Next Generation Emerging Markets Equity outperformed, rising 1.32% and 0.43% respectively. Within the global equity allocation, Polar Capital Global Insurance did best, rising 8.79%. Commercial insurers are benefitting from attractive returns on cash and higher premia because underwriting capital is scarce and natural disasters are increasing. First Sentier Global Listed Infrastructure also outperformed, up 6.14%. The iShares Physical Gold exchange-traded commodity fell 1.93% as investors took profits. Within the bond allocation, inflation protection increased through an addition to the Fidelity Global Inflation-linked Bond holding and the iShares \$ Treasury Bond 1-3 Years ETF was added. The WAY MA Cautious Portfolio rose 1.44% in November while the sector rose 1.63%.

Investment objective & policy

The objective of the Fund is to seek capital growth.

The Fund will seek to achieve its objective from an actively managed portfolio of collective investment schemes, investment trusts, other transferable securities including listed securities, cash or near cash, deposits and money market instruments. The Fund will typically invest between 20% and 60% of its portfolio in equity securities.

There will be no restrictions on the underlying content of the investments held, in terms of investment type, geographical or economic sector.

The use of derivatives and/or hedging transactions will be permitted in connection with the efficient portfolio management of the Fund (typically hedging, including investing in hedged share classes, which attempts to mitigate against falls in the value of the Fund's assets and the effects of changes in currency exchange rates against the Fund's base currency, which is pounds sterling). Borrowing of up to 10% of the Fund's net asset value will be permitted.

On giving 60 days notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes. It is not intended that the use of derivatives in this way will change the risk profile of the Fund.

Subject to the above, the Fund may invest in any asset class and adopt any investment technique or strategy permitted under the rules in COLL as such rules are applied to Non-UCITS retail schemes.

The Fund's benchmark is IA Mixed Investment 20-60% Shares. This represents a comparator benchmark because the Fund's performance can be compared to funds which also sit within this industry sector.
