Fund manager's commentary

Global equity markets recovered 4.21% in sterling terms in March as the Federal Reserve committed to move "cautiously" on interest rates in response to the elevated international risks to the US economy. The dollar fell 3.04% against sterling despite Brexit fears weighing on the pound. Falling US oil output contributed to a 5.28% recovery in the oil price in sterling. Evidence that the twin headwinds dogging emerging markets – dollar strength and weak commodity prices – had abated led to a sharp rally in Asia ex-Japan and emerging market equities, up 7.86% and 9.81% respectively in sterling. The WAY Global Red Active Portfolio's emerging market equity allocation rose in early 2016 to end the first quarter at 15.08%. The iShares MSCI Emerging Markets Minimum Volatility exchange-traded fund (ETF) was sold in favour of the iShares Core MSCI Emerging Markets ETF. Active fund managers generally struggled to keep pace in response to the reversal in market trends. Schroder SmallCap Discovery and Stewart Investors India Subcontinent underperformed, rising 2.74% and 4.43% respectively, but their experienced managers should keep pace over the longer term. The addition of the SPDR Barclays Emerging Markets Local Bond ETF provides exposure to the nascent recovery in emerging economy currencies. Falling volatility and increased risk appetite led to corporate bonds outperforming developed economy government bonds. Gilts fell marginally but sterling corporate bonds rose 3.08%. The iShares Global Inflation-linked Bond ETF rose 0.46% in sterling. The WAY Global Red Active Portfolio gained 2.48%† in March and the sector also rose 2.48%.
