Fund manager's commentary

Sterling strengthened 1.90% against the dollar and 1.57% against the euro after Mark Carney, the Bank of England governor, said the first UK base rate rise since the credit crisis could happen sooner than investors expected. UK equities fell 1.28%, underperforming global equities, which declined 0.10% in sterling. US equities gained 0.13% in sterling as unemployment fell to 6.10%. Investors shrugged off confirmation that severe winter weather had caused the US economy to show a 2.90% annualised first quarter decline. Japanese manufacturing stabilised and business confidence and retail spending recovered following Japan's consumption tax increase. Within the WAY Global Red Active Portfolio, the sterling-hedged GLG Japan Core Alpha fund rose 4.99%, outperforming the 3.72% rise in Japanese equities in sterling terms. China's purchasing managers' index, a lead indicator for economic activity, hit a seven-month high and the People's Bank announced small-scale, targeted measures to improve liquidity. UK commercial property proved more attractive than gilts and sterling corporate bonds, which fell 0.53% and 0.34% respectively. Schroder UK Smaller companies and CF Miton UK Smaller Companies were sold outright and a Deutsche Bank exchange-traded fund (ETF) was purchased. This ETF, which tracks an index of European property equities, adds pan-European property exposure to the portfolio. Blackrock Gold & General was the portfolio's top performer, gaining 10.94%. Gold equities were well-supported by the gold price prior to the 4.09% gain following advances by Iraqi Islamist insurgents. The WAY Global Red Active Portfolio fell by 0.62%† in June while the sector fell 0.36%.
